Professional Summary

Forward-thinking Software Quality Assurance Specialist with 3.4 years of experience in manual and automation testing across ERP, CRM, and Payroll web applications. Proficient in utilizing Selenium WebDriver, TestNG, and a range of automation tools to ensure product quality and performance. Expertise in designing robust test strategies, building custom frameworks, and delivering high-quality software solutions aligned with Agile methodologies. Skilled in API testing, CI/CD integration, and implementing data-driven approaches to enhance testing efficiency and accuracy. Demonstrates exceptional analytical, problem-solving, and collaborative skills, driving quality assurance excellence in fast-paced environments.

Skills

- **Automation Tools**: Selenium WebDriver, TestNG, JUnit, Maven, Jenkins, Cucumber (BDD)

- **Programming Languages**: Core Java, HTML, JavaScript (Basic)

- **Testing Tools**: JIRA, GitHub, Postman (API Testing)

- **Frameworks**: Page Object Model (POM), Data-Driven, Keyword-Driven, Hybrid

- **Database**: Oracle SQL

- **CI/CD Tools**: Jenkins, GitHub

- **Testing Expertise**: Functional Testing, Regression Testing, Retesting, Cross-Browser Testing, API Testing

- **Agile Methodologies**: Scrum, Sprint Planning, Daily Standups, Sprint Review, Retrospectives

---

Professional Experience

Software Quality Assurance Engineer

Converjit Inc., Canada (Remote) | Nov 2022 – Present
Project: CPS Payroll

- Led end-to-end payroll testing, ensuring compliance with federal, state, and local regulations.

- Automated regression test suites, reducing manual effort by 30% and increasing test coverage by 25%.

- Improved payroll processing accuracy through comprehensive data validation and audit trails.

- Enhanced testing frameworks using Java, Maven, and Jenkins for seamless CI/CD integration.

- Collaborated with cross-functional teams to reduce error rates by 15%, improving workflow efficiency.

Software Test Engineer
Optus Infotech Private Limited, Hyderabad, India | Mar 2022 – Oct 2022
Project: Vinnig ERP

- Developed and implemented POM and Data-Driven Testing frameworks, streamlining automation processes.

- Executed over 150+ test cases, achieving 100% test coverage for key ERP business modules.

- Conducted functional, regression, and retesting to validate business workflows, ensuring adherence to requirements.

- Generated detailed test execution reports and defect logs in JIRA, expediting defect resolution.

- Participated in Agile ceremonies such as daily standups, sprint planning, and reviews.

Associate Test Engineer
Optus Infotech Private Limited, Hyderabad, India | Sep 2021 – Feb 2022
Project: Slim CRM

- Designed test cases focusing on CRM functionalities and customer data flows, improving feature stability.

- Executed system regression testing, ensuring consistent performance across multiple releases.

- Collaborated with developers to resolve critical defects, enhancing user experience and performance.

Education

Bachelor of Engineering (Electronics & Telecommunications)
Sant Gadge Baba Amravati University, Amravati, India | 2015

Languages

- **English**: Fluent

- **Marathi**: Native

- **Hindi**: Fluent
