KRUTIKA K. CHITRAV

Software Test Engineer

PUNE, MAHARASHTRA-411015

8626061809 | krutika5586@gmail.com

Objective:

Desire to become part of an experienced team of software testers who are focused on debugging programs, writing test scripts, and executing tests cases effectively & delivering high-quality products within tight deadlines.

Experience: (3+ Years)

Test Engineer | Netwin System & Software, Nashik   March 2022 – Present

➢ Domain: Banking

Roles & Responsibilities:

- Experienced in Banking Domain Web Application Testing, specializing in online banking portals and financial management systems.
- Proficient in executing a variety of testing types essential for ensuring comprehensive software quality assurance. Conducted rigorous Integration Testing to verify interactions between various system components.
- Expertise in Regression Testing to confirm system stability after modifications.
- Conducted thorough Negative Testing to assess system resilience under adverse conditions.
- Skilled in End-to-End Testing to validate system workflows across all modules.
- Executed System Testing to ensure all aspects of the software met functional and non-functional requirements.
- Proficient in conducting thorough release testing to ensure software quality and functionality prior to deployment. Skilled in preparing comprehensive release notes detailing new features, enhancements, and bug fixes. Ensured smooth and efficient software releases by collaborating with development teams.
- Solid understanding of testing terminology, encompassing key concepts such as unit testing, integration testing, regression testing, and acceptance testing. Proficient in verification and validation processes to ensure software meets specified requirements and quality standards.
- Developed comprehensive test scenarios and test cases based on functional specifications and user stories.
- Executed test cases manually to validate software functionality, ensuring adherence to quality standards.
- Wrote SQL queries to insert and manipulate data in relational databases.
- Created test data from backend to facilitate software testing processes and scenarios.
- Collaborated closely with developers to provide comprehensive support in defect analysis and resolution.

- Proficient in multitasking, adeptly managing multiple issues and tasks concurrently while ensuring seamless communication and resolution by connecting with on-site resources when necessary.

Jr. Software **Tester** | XpertIOS Solutions, Pune   February 2021-March 2022

➢ Domain: Media & Entertainment

Roles & Responsibilities:

- Reviewed functional requirements and use cases documented in Requisite to ensure clarity, completeness, and alignment with project objectives.
- Documented quality issues identified in software products to enhance product reliability and user satisfaction.
- Identified program variances through comprehensive testing processes, ensuring accuracy and reliability in software performance.
- Identified software defect
- Executed software compatibility tests and documented the results
- Performed the Retesting
- Performed the System and Functional testing of every build of software

Education:

Course/Degree	Institute	University	Grade/Score	Year
B.E. Computer Science	Sanghavi College of Engineering, Nashik	Pune University	71.66%	2017
HSC	J.E.S. Jr college, Indore, Nashik	Maharashtra State Board	56.60%	2014
SSC	Janata English School Dindori	Maharashtra State Board	80.73%	2010

Academic Project:

❖ Project: Agricola (Inventive Farming)
- System application will help farmers in sowing the right seed based on sensor value as well as pH value of soil in throughout the crop timespan. This system will give the yield prediction and preventive measures in case of climatic changes. AlterNet crop recommendation is possible which will be favorable according to soil texture of different part of the farm.

Technology Used: Android

Personal Detail:
