Proficient in creating, executing, and documenting test plans and cases, identifying and managing defects, and ensuring software reliability. Skilled in Functional, Regression, Integration, and User Acceptance Testing, Performance Testing with strong understanding of SDLC, STLC and testing methodologies.

Experience:-

YT Solutions Tech Pvt. Ltd., Nagpur

QA Level - I [September 2022 – Present]
- To understand project requirements, specifications document both high level and low
- level.
- Creating & Execution of Test Cases based on requirements
- Write a manual test case and review the existing one.
- Execution of Test Scripts/Test Scenarios in different test environments/machines and update the results in excel.
- Executes test cases after every build release on Local,Staging & Live server
- Logging defects and issues, providing detailed information to developers.
- Prepared Daily test execution & defect reports.
- Creating and Maintaining test documentation, including test plan, test cases and defect reports.
- Client interaction as per the new requirement of Project
- Providing regular status updates and test reports to the Project Stakeholders.

Projects:-

Project 1:   Production Level Management & Reporting System (Web Application)

Role: **Software Tester**

Description: The project focuses on a Production Management and Reporting System designed to track Sales and Purchase Order data for jobs across various work centers. It provides job-specific details, work locations, and relevant data. The system includes a Financial Report module, enabling users to view financial data based on job status. Responsibilities included developing manual test cases and conducting functional, non-functional, and performance testing by measuring the runtime of each module by using Java melody and through Inspect

Project 2:   Production Operations Scheduler System (Web Application)

Role: Software Tester

Description: The project involves a Production Management System for Molding, designed to track job workflows across departments, work centers, and machines using manual and auto-scheduling based on various criteria. It features graphical job progress tracking, a Quote Module for item quotations based on material and pricing, and a Time Clocking Module for monitoring employee work hours, attendance, and payroll generation. Responsibilities included creating manual test cases and performing functional and non-functional testing throughout the project.

Project 3:   Auction Management Software (Product & Mob. Application)

Role: Software Tester

Description: The project focuses on implementing a reverse auctioning system for RFQs, allowing materials to be awarded to vendors based on pricing. It includes a dashboard with real-time auction progress and bar graphs showing purchase savings based on quoted and awarded prices. Responsibilities included developing test cases, conducting manual testing to optimize the auction, inventory, and bidding processes, and performing end-to-end testing of live auction demos across various operating systems and browsers.

Skills:-

Manual Testing: Test Planning, Test Case development, Test execution, Defect tracking, Regression testing, Functional - Non-Functional Testing, User Acceptance Testing (UAT), API Testing etc

Tools: JIRA, Postman, Excel, Figma etc

Methodologies: Agile, Scrum, Waterfall.

Technology Worked:- JAVA, Postgres, SQL , JAVA Melody etc.

Environment:- Local, Staging, Production & Codero etc

Operating Systems: Windows 7, Windows 10

Soft Skills: Analytical thinking, Attention to detail, Problem-solving, Communication, Teamwork.

Education Qualification:

- **Bachelor of Engineering** in Mechanical Engineering, from DMIETR, Wardha, Nagpur University **75.4%**. in 2020
- **10 + 2** with Science from Maharashtra State Board with **73.85%.** in 2016
- **10th** from Maharashtra State Board with **87%** in 2014
