About Glaxit

Glaxit offers services and technologies to organizations that help them enhance their customers by streamlining processes, lowering operational costs, and making management easier.

Glaxit is well-known among its clients for providing high-quality, dependable products. Our clients appreciate our expertise in real estate, Healthcare, Education, E-Commerce, Banking, Textile, Manufacturing and management systems.

Our clients come from all over the world, including the United Kingdom (UK), Germany, Australia, Norway, and New Zealand.

Company History

In 2017, a group of young entrepreneurs from Islamabad, Pakistan, started Glaxit (SMC-Pvt.) Ltd. to make smart software solutions for small businesses. The company quickly built a good reputation locally by focusing on smaller projects. In 2018, two founders moved abroad, leaving Muhammad Kashif and a friend to keep running the business. They moved the company to Taxila, just outside the capital, where Glaxit did well.

When the global pandemic hit in 2020, Glaxit turned the challenge into an opportunity by helping businesses move to remote work. Despite the difficulties, they successfully helped over 20 clients, a major achievement.

By 2022, Glaxit had expanded its services and partnered with UAE-based Agile Managex Technologies, working on Robotic Process Automation and business development projects, showing their growing expertise internationally. In 2023, Glaxit turned its focus to new innovations like AI, Data Science, and Cyber Security. By 2024, the company had started working with universities to help students prepare for the increasing demand in IT fields.

Today, Glaxit is recognized for its innovation, growth, and client focus, staying true to its roots in Taxila while looking toward the future.

Vision & Mission

Vision

Our vision is to continuously grow and merge to become one of the top IT service providers in a competitive market not only at the national but also at the international level.

Glaxit's service delivery processes truly reflect our core values of professionalism, flexibility, and dedication. We with our professional services, we enable our customers to accelerate and expedite the resolution of their required IT problem. We believe that we were put on the planet to create great products. We are always looking for new ideas and ways to innovate. We believe in group collaboration that allows us to think outside the box.

Mission

Glaxit's mission is to help their valued customers' businesses grow and progress by providing them with the most inventive and advanced Design and Developmental solutions to their web-based problems. Our high-quality market-defining solutions help our customers gain a competitive advantage in markets around the world.

Customer Satisfaction & Goals

We develop software to address real-world challenges because of our passion and commitment to our clients. Our dedication and hard work enable us to become a great business for ourselves, our clients, our community, and the world.

Deploying new technology and creative ideas could be a good indicator of your company's success. We at Glaxit understand this, which is why one of our core values is to provide our customers with cutting-edge technology and ideas to help them excel in the market.

Our Goals

1

Innovate Continuously:

Develop cutting-edge software solutions that set industry standards.

2

Enhance User Experience:

Prioritize intuitive, user-friendly design in all products.

3

Ensure Reliability:

Deliver scalable, secure, and high-performing software platforms.

4

Expand Market Reach:

Grow globally by entering new markets and adapting to local needs.

5

Foster Talent:

Attract, Train, and develop top talent to drive innovation and growth.

Our Core Values

Our employees are important, so we offer an exceptional balance of work and life. Check your ego at the door. Always be honest in dealing with others. Treat employees, clients and vendors how you want to be treated. Work hard every day for our clients and for each other. The willingness to take responsibility for one's own actions

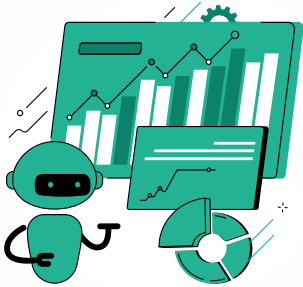

Companies---strong organizations --- centered on these values. They are invariably successful. Almost always, these core values generate other values in employees.
