SKILL SET

Skills	Technologies
Methodologies	Agile, Waterfall
Automation Testing Tools	Selenium WebDriver, Maven, Rest Assured, Requests, Postman, Cucumber, TestNG, Jenkins, Git, GitHub, Selenium grid, Pytest, Bdd-Behave, POM
Language and Framework	Python Java, Page Object Model
Programming Languages	Python3, Core JAVA (Eclipse, PycharmIDE)
Bug tracking tool	Jira
Test case tracking tool	Test Rail
Databases	MySQL

CAREER SUMMARY

ISTQB CTFL Certified QA Engineer with 3 years of experience in Functional and Automation Testing across Retail, and Supply Chain sectors. Proficient in **Selenium WebDriver (Python, Java)**, **BDD (Behave, Cucumber)**, and **API testing (Rest- Assured, Requests, Postman)**. Experienced in **UI and API framework design** using **TestNG** and **Pytest, Python**.

- **3 years of experience in automating web applications using Selenium WebDriver with Java and Python, Cucumber, TestNG, GitHub, and MySQL. Proficient in handling web elements in Selenium WebDriver.**
- Experience in **Restful** web services Automation Testing using **Rest-Assured Library in Java and Requests in python** and **Manual Testing** using **Postman** (Get, put, post and delete methods).
- Working in automation frameworks from scratch like **Page Objects model** creating test scenarios, test cases in existing framework.
- Writing Test cases using Element locators, **Python and java programming features and TestNG annotations, listeners and factory methods. Executing Selenium Test cases and Reporting defects.**
- Experience in **BDD, Data driven testing**, Cross browser testing and Parallel Test execution.
- Experience with Data provider for parameterization and Experience in **TestNG and Pytest as unit testing framework** and **Extent Reports, Pytest-HTML report** and cross browser testing with Selenium grid.
- Having a Good experience in deployments tools like **Jenkins and** repository management in **Git, Gitlab**.
- Defect/Test Management tool **JIRA**.
- **Automated End2End test cases** using selenium Web driver.
- A good team player, a quick learner with a high degree of commitment.
- Motivated to work individually, always flexible and supported in team.

- Experience in working closely with developers and Specialized in working on **Agile Projects**.
- Good analytical skills to aid in troubleshooting and problem solving.
- Good testing principles as well as good defect management skills.
- Experience and knowledge in software methodologies include **Agile and Waterfall methodologies**.
- Experience in various types of testing - Web services, Web-based.
- Intensive experience in preparing test scenarios, writing test cases, giving test case reviews to clients, test execution and raising defects.
- Triggering the smoke and regression scripts when deployment happened in QA, UAT as well as sending the reports to team members about the build health.
- Experience in **End-to-End Testing**, Retesting, **Regression testing**, Functional, **Exploratory Testing**, Ad- Hoc testing, Smoke testing, User Acceptance testing and involved in release planning activities.
- For agile project Involved in client scrum calls, Communication with client, reporting to scrum master and giving demos to QA team in each iteration in addition to testing.
- Involved in defect review meeting with developer, product members to make it close and knowledge on defect tracking and different ways of reporting format.

CORE COMPETENCIES

- Operating System : Windows
- Languages : **Python, Java**
- Tool : **Selenium**
- Software Testing Skills : **Functional Testing, Automation Testing, Selenium Webdriver, Cucumber, Pytest, BDD, Git**

PROFESSIONAL WORK EXPERIENCE

- **Undocked Technologies India Private Limited** (22th May,2022 -Present) as **Software Engineer**.

- **Project** : **Transportation Management System** (Domain: Retail logistics)

Project Duration : **May 2022- Present**

Technology used : Selenium Webdriver with Java and Python, Pytest, Rest Assured, JIRA

Description : Perform logistic operations such as create an order and shipped to location.

Roles & Responsibilities:

- Designed and developed automation testing framework with Java and Python from scratch and added more features as Reporting.
- Creation of automation test scripts for UI and API and execute and share the report.
- Localization testing by calling json API.
- Perform End to End testing for each module and Regression testing of application on defects fixed.

EDUCATIONAL QUALIFICATION

Degree	University Name	Percentage/CGPA
PG-Diploma	CDAC Bengaluru	69.13%
Graduation(B.E)	CSVТУ, Bhilai	73.89%

ACHIEVEMENTS

1. Received a **“Dashing Debut Award” Uplift Q3 2023** for the Best Performance in Automation and implemented reporting feature in a test Automation Framework
2. Received **Kudos** for excellent Performance in the team, team player and completing tasks before deadline.
3. Received **Kudos** for being confident in work and accomplished task in a time.
