PROJECT WORK

- ### Final Year Project

  Enhancing MAR Efficiency with computation offloading Techniques

  Connect AR is an application built meing the Unity game engine developed by Unity Technologies and Photon engine for multiplayer game development is built to understand how computation offloading works across more than a single device.

- ### Third Year Project

  E-farming Management system

Majority of farmers in the state or country are not aware about information of government plans or how to buy or sell yields. We have developed integrated application for farm management which works, on first building decision tree for recommendation of agricultural solutions.

- ## Second year Project

Unit Conversion App

Units play important role in our day-to-day life. We consciously or unconsciously convert one unit to other. An app that can convert various units into another is making life easier for mankind.
