*Verve Square Technologies*

Service Offerings

About us

- Verve Square Technologies is a Quality Engineering and Software Testing organization.

- Team of Expert Test Professionals, comprising of industry-certified and experienced people

- End to End services in Quality Assurance through our Quality Engineers and Software Developers in Test

- Partner with our clients to help them optimize COQ and ultimately reduce TCO

- Aspire to accomplish a value-based outcome for each of our clients with high quality delivery coupled with cost effectiveness

Three Main pillars of our Delivery approach

Technical Excellence	Client Focus	High Performance Teams
- Full-time team dedicated to QA and Test Process Improvements - Experienced pool of Test Architects available to support test teams - Disciplined processes and leading-edge methodologies	- Large enough to execute big projects; small enough to be agile - Simple organization with strong commitment to customer service - Solid understanding of business processes, trends and best practices in the industry	- Expertise across industry tools and methodologies - Compatible with global time zones including U.S., Australia, South-East Asia and Europe - Best talents in the region

Our Values

Passion for Software Testing	Focus on Innovative mindset	Customer Centric Approach	Cost effective optimized solution

Our Positioning
