About Me

✓ I have more than 3 years of experience in Blockchain Development. I leverage my strong technical skills and commitment to continuous learning to create innovative and secure blockchain solutions. I'm confident my expertise aligns perfectly with your company's next Blockchain Engineer role.

✓ I have experience in building smart contracts for Hibby Game contracts (Hibby is a reward game when you join the game you will get a reward), Cepheus auto contract deployer (a contract that can deploy different types of contracts), NFTs (ERC721, ERC1155), NFT's exchange (a marketplace for NFT's ERC721 and ERC1155), Vesting contract (a contract that can manage Private sale tokens), Bot development (Front running and snipping bot), ERC20 tokens, Nft staking, and reward contract (If you will stake your NFT's you will get rewards). I also worked on different types of software products like Cepheus (a platform where users can stake NFTs and get rewards), swap(a clone of Uniswap), and NFT marketplace (an advanced version of open-sea).

✓ I have 1 year of experience in Node.js backend development, where I have honed my skills in building efficient and scalable server-side applications. I am passionate about writing clean, maintainable code and continuously improving my technical expertise. I am confident that my experience and problem-solving mindset will contribute to the success of your team in the next Node.js Backend Developer role.

Skills Highlights

✓ Solidity
✓ Hardhat, Truffle
✓ OpenZeppelin
✓ Ether.js
✓ WEB3 DAPP's
✓ HTML5, CSS
✓ JavaScript
✓ NodeJS
✓ Express
✓ MongoDB

✓ Smart contract development
✓ NFT marketplace development
✓ Bot development (front running and snipping bot)
✓ NFT staking
✓ Smart contracts: ERC20, ERC721, ERC1155, etc.
✓ ICO smart contract development
✓ Ethereum, Polygon, and Avalanche Blockchains

Education

BSC (Computer Science)
Devi Ahilya Vishwavidyalaya, University in Indore, Madhya Pradesh.
(2014 - 2018)

Experience

BENZATINE INFOTECH - (Mar - 2023 to Present)
Senior Blockchain Engineer

DURE DEVELOPMENT - (Oct - 2021 to Jan - 2023)
Blockchain Engineer

Project Work

Project Name: MAGIC CLUB

Landing Page: https://www.magicshoes.io/
Magic Club: https://www.magicclub.io/
Application: https://play.google.com/store/apps/details?id=com.magic.shoes.dev

Detailed Description:

https://www.benzatine.com/blog/stepn-clone-app-a-move-to-earn-and-fitness-game-in-web3-with-cryptocurrency

Technology: Solidity, Hardhat, OpenZeppelin, Polygon, Explorer Knowledge, JavaScript, Remix IDE, Ethereum, MetaMask, Ether.js, Chai, Mocha

- Magic Shoes is a mobile application and NFT marketplace that enables users to earn MCT by walking or running outdoors after purchasing Magic Shoes NFTs. It is a polygon blockchain reward-based Move to Earn platform.

- Magic Shoes is an M2E fitness reward platform that can be played while walking, running, or riding a bicycle. Download the app and equip Magic Shoes NFT sneakers to earn tokens. Each sneaker has a unique design and rarity and can be upgraded to make it even more powerful.

- The MAGIC CLUB NFT Exchange and the MAGIC SHOES M2E project will serve as a medium between community users and the four Dokkaebi gods who will bring them wealth and honor.

Project Name: EVELON

❖ That supports Dynamic NFTs.
❖ NFTs can change automatically concerning time.

Project Name: CEPHEUS (PART OF EVELON)

❖ A Platform that supports staking NFTs.
❖ Supports token deployment without the user having technical knowledge.
❖ Supports NFT's deployment without the user having technical knowledge.
❖ NFT marketplace is like the open sea.

Project Name: HIBBY FINANCE
Description:

- Create a smart contract for the Hibby game, Hibby ERC20 token, and private sale contract. Hibby game is a chain creation game in which the user goes to the Hibby site and can create his chain by paying Hibby tokens they will get their reference link which they can share with their friend and if their friend joins the chain by paying Hibby tokens then the owner of the referral get some percent of reward. The properties of the Hibby Token are as follows.

❖ They are ERC20 reflective tokens with tax for three accounts.
❖ Tax only be applied on the selling of the Hibby token on the pancakeSwap.
❖ Tax will automatically be converted into the BUSD token and sent to the tax addresses.
❖ Private sale contract that Creates some referral links for the admin. He can share with the influencers,

influencers can share their referrals and if a user buys Hibby tokens from that link, the influencer will get 5 percent of the Hibby token that he buys.

NODEJS BACKEND PROJECTS

Project Name: RIPPLE CRM

Application: https://blackhawk.ripplesecurehosted.com/

Description:

- Create Ripple CRM was developed for Lead & Client Management, Workflow Automation, Customer Service, Employee Tracking, Collecting Real-time data, CRM analytics, Reporting, Event Management and Email Campaining.

Project Name: TALLY DASHBOARD CRM

Application: Https://apps.tallydashboard.net

Description:

- Success starts with great tools, great service and a systematic approach to managing it all. Tally Mobile CRM comes fully loaded with essential core features to help you and your business be more successful.

Feel free to reach out to us if you want to check our recently completed projects, it would be our pleasure to share further details with you…

Thank You!
