Career Objective

To contribute to the success of a forward-thinking organization by leveraging my skills as a Front-End Developer. I aspire to deliver outstanding user experiences, continuously enhance my technical expertise, and drive impactful results.

Professional Summary

- 2+ years of hands-on experience in Front-End Web Development, specializing in building modern, responsive, and user-centric applications.
 - Expertise in React.js, Redux, JavaScript (ES6), Material UI, Bootstrap, HTML5, and CSS3.
 - Proven ability to create cross-browser compatible and responsive designs.
 - Proficient in React concepts (hooks, state management, Context API) and libraries such as Axios, React-Redux, and Formik.
 - Skilled in Agile development methodologies, ensuring team collaboration and project success.
 - Hands-on experience with tools like Visual Studio Code, GIT, Postman, and build systems like Webpack and Babel.
-

Technical Skills

- Languages: JavaScript (ES6+), TypeScript
 - Web Technologies: HTML5, CSS3
 - Frameworks & Libraries: React.js, Redux, Material UI, Bootstrap, Formik
 - Tools: Visual Studio Code, Sublime Text, GIT, Postman
 - Build Tools: Webpack, Babel
-

Education

Bachelor of Computer Applications (BCA)
Savitribai Phule Pune University, Maharashtra

Professional Experience

Front-End Web Developer

Primal Infosys, Pune December 2022 – Present

Project Highlights

1. Trip Tastic (Tourist Guide App)

- **Environment:** React.js, JavaScript, Material Design, Node.js, Express.js, MongoDB
- **Role:** Front-End Web Developer

Description:

A dynamic web application offering personalized tourist destination recommendations, detailed location insights, nearby attractions, famous eateries, and accommodations. Integrated features include geolocation-based suggestions and dynamic CRUD operations.

Key Contributions:

- Developed and maintained the front-end using React.js.
- Implemented geolocation functionality for personalized suggestions.
- Designed responsive, dynamic pages for managing destinations, hotels, and restaurants.
- Ensured seamless user experience using Material UI and Formik for form validation.
- Collaborated with back-end developers to integrate APIs.
- Deployed the application on Netlify for live access.

2. Food Order App

- **Environment:** React.js, JavaScript, HTML, CSS, Bootstrap
- **Role:** Front-End Web Developer

Description:

A web application that enables users to explore menus, customize orders, and place delivery requests with real-time updates and a responsive interface.

Key Contributions:

- Designed and implemented an intuitive user interface using React.js.
- Developed dynamic components for menu updates and cart management.
- Styled the application for mobile responsiveness using Bootstrap and custom CSS.
- Managed state effectively using Redux for enhanced performance.
- Conducted rigorous testing to ensure reliability and user satisfaction.
