PROFESSIONAL OVERVIEW

I am a passionate MERN Stack Developer with a strong foundation in modern web development, gained through academic training and hands-on projects. Skilled in MongoDB, Express.js, React.js, and Node.js, I specialize in building responsive, user-centric web applications. With experience in both front-end and back-end development, I am committed to writing clean, maintainable code and eager to contribute to innovative development teams.

Work Experience :

React Developer Intern at Bismi Technologies from March 2024 to June 2024

- Created a fully functional website under the guidance of seniors,
- Mainly focused on REST API, integrated with Continuous Integration and Continuous deployment pipeline

Study-Notion [GitHub](#)

- Built a full-stack E-Learning web application using MERN stack with role-based access for Admin and Student.
- Integrated JWT-based authentication and authorization to securely manage user sessions and protect role-specific routes.
- Implemented Admin functionalities to create, update, and delete courses, providing full control over course content management.
- Designed the Student module to allow users to register, purchase courses, and access learning materials only after successful payment and login.
- Applied React.js for dynamic UI, MongoDB for scalable data storage, and Express.js with Node.js to build a secure and maintainable backend.

Personal Project :

Blog App [GitHub](#)

- Developed a Blog Management System using MERN stack featuring role-based access control for Admin and User roles.
- Implemented JWT-based authentication and authorization to secure routes and ensure only authenticated users can access specific functionalities.
- Enabled Admin functionalities including creating, editing, and deleting blog posts, with real-time updates on the frontend.
- Built a User module allowing registered users to log in and read blog content, enhancing user engagement and access control.
- Ensured a seamless UI/UX by integrating React hooks and conditional rendering, along with responsive design principles for accessibility across devices.

SKILLS :-

Front-End: HTML5, CSS, JavaScript, ES-6, react.js, Redux
Framework: Tailwind CSS, Bootstrap.
Version control: Git/hub, Postman
Back-end: Express.js, Node.js
Programming language :- java
Database: SQL, MongoDB,, NoSQL

EDUCATION

GH. Raisonni University, Amravati | Nagpur | Master in Computer Application
Prerna College of Commerce |Nagpur| Bachelor of commerce in computer application (BCCA)

Aug 2024 ||CGPA 8.9
Nov 2020 ||CGPA 7.2
