AL BADR RADIATOR IND L.L.C

Company Profile

WE MANUFACTURE AND REPAIR ALL TYPES OF
 COPPER BRASS RADIATORS • ALUMINIUM RADIATOR • OIL COOLERS • INTERCOOLERS
 HEAT EXCHANGERS • A/C CONDENSERS • BRAKE LINING • CLUTCH PLATES

P.O.Box : 151156, Industrial Area 13, Sharjah UAE
 Tel.: 06 5953549, Mob: 050 8772628, 050 8772630
 E-mail: Info@albadrradiator.com, Web: www.albadrradiator.com

AL BADR RADIATOR IND L.L.C

Services division

SERVICE ALL TYPES OF COOLING SYSTEMS

- > Copper Radiators
- > Aluminum Radiators
- > Oil coolers
- > A/C Condensers
- > Brake Lining
- > Drum Skimming
- > Pressure Plate Facing
- > Brake Disc Facing
- > Fly Wheel Facing

AL BADR RADIATOR IND L.L.C

Automotive Applications

Re-core, repair and servicing for car and trucks radiators of today and the innovations of tomorrow's automotive industry.

We manufacture commercial and industrial grade car and truck radiators that are energy efficient, durable and high quality. Our aim is to decrease life-cycle energy consumption.

We align our manufacturing processes for automotive radiators with the latest technological developments to meet the demands of more power. Improved heat dissipation and the use of less hood space.

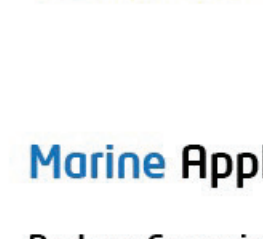

Improved Heat Transfer Performance to Reduce Overheating & Breakdowns.

We offer a wide variety of radiators and applications in varying materials including brass, copper, aluminum and plastic aluminum radiators. We can match the specs and requirements of your automobiles to the most suitable material for improving performance and reducing stress on engine parts caused by overheating.

Marine Applications

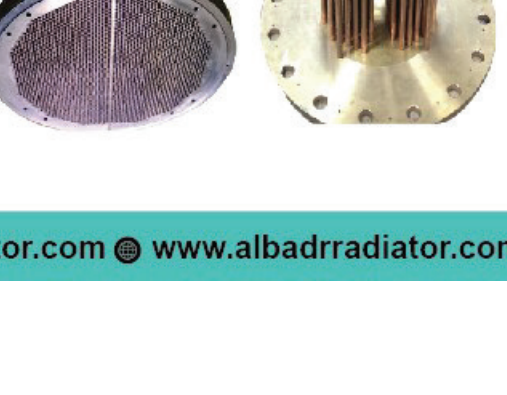

Reduce Corrosion of Marine Applications by Using Brass Copper Radiators

Our marine brass copper radiators have a high natural resistance to bio-fouling which is a common challenge for marine applications due to the long-term submersion in water. We offer heavy-duty seamless radiators that match the can requirements of the marine industry and are able to function and sustain a high level of performance in wet environments.

Applications, Replacements and Upgrades on Marine Heat Exchangers

The Best Oil Cooler Solutions for the Mining Industry

We've developed hi-tech oil cooler solutions for cooling hydraulic systems and equipment on mining plants. We've devised our applications to be suitable for harsh and wet environments, perform under high pressure and minimize thermal stress.

Brass Copper Radiators for Heavy Duty Performance

Our brass copper radiators are strong enough to support heavy duty and consistent mining activities without failing. We provide and repair heavy-duty seamless radiators with a focus on stability, longevity and smooth performance over extended periods of times.

Mining Applications

Intercoolers Fit to Withstand Mining Activities

We offer safe and reliable intercooler cores for the mining industry can confidently depend on for performance and endurance. We have a large range of intercooler applications that are specifically tailored for mining equipment and machinery.

The Best Oil Cooler Solutions for the Mining Industry

Power Generation

Advanced Intercoolers Specially Developed for Power Plants

Our intercoolers are remarkably effective at reducing the energy required to compress air in high intensity environments. Our power generation intercooler cores increase power generating efficiency and thermodynamic performance.

Aluminum Radiators that Optimize Heat Transfer for Hazardous Environments

Where safety is a primary factor our Aluminum Radiators provide the ideal cooling application for power generation facilities. They have an exceptional capacity for transferring heat from high intensity equipment and machinery typically used in power plants.

Reliable & High Performance Brass Copper Radiators

Our brass copper radiators are well suited for the power generation industry, which requires a high degree of reliability and sustainability. We provide applications and repairs for Cores, Zigzag Fin Cores, Flat Fin Cores and Heavy Duty Seamless radiators to match the requirements and operations of your power plant.

AL BADR RADIATOR IND L.L.C

Industrial Application

AL Badr Radiator Ind L.L.C. we've sat at the forefront of innovation and technological advancement in the cooling industry. we are providing exceptional cooling applications to a variety of industries world-wide, we've developed invaluable knowledge and expertise in the domain of commercial and industrial cooling applications.

We're proud to provide customers with a one-stop comprehensive solution for cooling systems including manufacture, repair and services and an extensive product range in the categories of radiators, coolers and brake lining.

We are able to provide our products and services to clients globally and continue to expand our reach to meet the growing international demand for AL Badr Radiator Ind L.L.C and accessories.
