Introduction & Value Proposition

About Us

Founded in 2016, The Eminence Technology Solutions (TETS) is a premier Software Testing company based in Madurai, Tamil Nadu. We specialize in delivering end-to-end Software Testing Solutions, ensuring the delivery of high-quality software products to our clients.

What We Do

Helping European businesses enhance Software Quality with cost-effective QA solutions from India.

Key Differentiators

- Expertise in Functional, Automation, Performance, and Security Testing
- Compliance with GDPR & ISO standards
- Dedicated teams with flexible engagement models

Challenges in Software Development Without QA

Common Issues Faced by European IT Clients:

- Frequent bugs and crashes
- Delayed software releases
- High cost of fixing defects post-production
- Poor user experience leading to churn

Data-Driven Insights:

- Companies lose \$1.7 trillion annually due to software failures.
- 80% of software development costs go into bug-fixing if QA is ignored

Why QA Services Matter?

QA plays a crucial role in software development by identifying defects early, ensuring product reliability, and enhancing user experience.

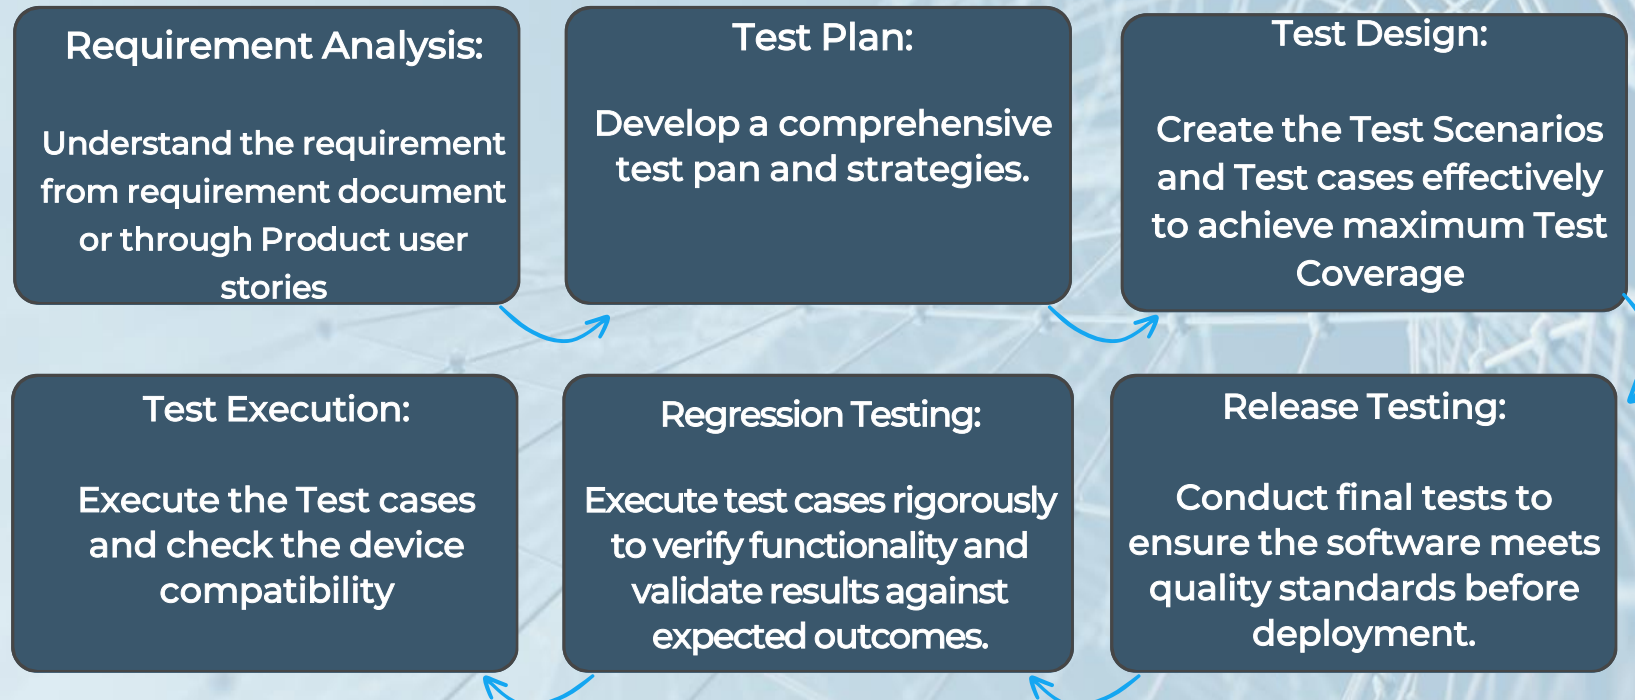

By preventing costly post-release fixes and reducing rework, QA saves costs and improves efficiency, leading to faster time-to-market and higher customer satisfaction.

Benefits of Outsourcing QA to India

- 40-60% Cost Savings Compared to In-House QA Teams
- Time-Zone Overlap for Efficient Collaboration
- Skilled & Certified QA Engineers

Our QA Process

Project Process

Our QA infrastructure supports a robust project process, which includes:

Tools & Technologies We Use

SoapUI

Kali Linux

Burpsuite

AZURE DEVOPS

CUCUMBER

Jasmine

ROBOT FRAMEWORK

PYTEST

Java

PYTHON

Case Study: Success Story of a European IT Client

Industry : Fintech

Location: UK

Challenges: Large number of test cases & slow testing life cycles

- Separated and Prioritized Regression Test cases for Test Automation
- Designed automated testing suites with Selenium C# and SpecFlow.
- Integrated tests into the CI/CD pipeline.
- Attained 80% of Automation Test coverage.

Industry: EduTech, E-learning

Location: France

Challenges: Minimal internal QA resources and no pre-existing test cases or quality frameworks in place

- Implementation of a tailored QA process.
- Improvements in product quality and development efficiency
- we ensured comprehensive test coverage
- Test automation reduced regression testing time from multiple days to overnight,

Why Choose Us?

- Proven track record with European IT companies
- Flexible engagement models (Dedicated QA team / On-demand testers)
- Industry-standard compliance & certifications
- Agile & DevOps-friendly QA approach

TEST CONSULTING

- Feasibility Analysis
- Tool Selection
- Effective QA Strategy
- Functional and Non functional testing guidance

BENEFITS

- Dedicated Expertise
- Cost Effectiveness via outsourcing
- Latest tools and frameworks
- Leverage open source tools
- Process improvements

Engagement Models

Model

- Dedicated QA Team
- On Demand Testing
- Automation Setup

Best For

- Long Term Projects
- Short Term Needs
- Test Automation Needs

Features

- Full time Engineers, Scalable team
- Pay-as-you-go model, flexibility
- CI/CD Integration, Custom Scripts

Client Testimonials

A very professional and thorough approach to software testing. They did a great job and discovered several bugs that other beta testers skipped. Highly recommended - **Klemen S / HESK**

This is the best Testing team to work with. Throughout our project the experience was nothing but exceptional. Will definitely hire again for our next project - **Dare O/Dare.io**

La empresa nos ha realizado un excelente trabajo – **Xavi/Kanguro**

Did exactly what was required for the project, appreciate the quality work delivered on time and in budget. – **Aaron/Bootcamp**
