PROFILE

I'm a passionate and detail-oriented Software Developer with strong experience in building responsive web applications and dynamic user interfaces. Proficient in front-end and back-end technologies, including JavaScript, React.js, Node Js, and MySQL. I specialize in creating clean, maintainable code and delivering scalable software solutions.

WORK EXPERIENCE

● ZIXIN INFO TECH PVT LTD web developer(Internship)

- Projects
- tcompact "This project includes only the frontend development of a software education institute website. The UI is completely responsive, built using modern web technologies."
- "I developed the complete frontend for a software education institute website. The design focuses on responsiveness, smooth navigation, and clean UI structure suitable for both desktop and mobile devices."
- "Frontend Development: Designed and built a fully responsive user interface for a software education institute web application using React, ensuring cross-device compatibility and optimized user experience."

Life Care Hospital Management System

- React JS • Node JS • Express JS • MongoDB
- A full-stack hospital management system with user authentication and patient administration features. Designed to improve healthcare workflows by managing appointments, patient details, and hospital operations digitally.
- Key Responsibilities & Features:
 - Developed frontend using React with responsive UI design
 - Created backend REST APIs with Node JS and Express JS
 - Implemented secure Login and Registration using JWT
 - Integrated MongoDB for data storage and CRUD operations
 - Managed patient records and appointment data efficiently
 - Ensured smooth communication between client and server

- Personal Portfolio Website HTML, CSS, JavaScript, React.js A modern and fully responsive personal portfolio website showcasing professional skills, projects, and achievements. Designed with clean UI and smooth navigation, allowing visitors to easily contact through integrated email service.
