Flutter Developer

AMRA C

+91-9895-788-963 | Linkedin | GitHub | amrac272@gmail.com

I'm a Flutter Developer with over a year of hands-on experience in mobile app development. I possess a solid foundation in creating dynamic and responsive user interfaces using Flutter, coupled with efficient state management and both backend and frontend integration. My expertise lies in building cross-platform mobile applications that deliver seamless user experiences on both iOS and Android devices. I have successfully integrated various APIs and Firebase services to ensure robust app functionality. My commitment to staying updated with the latest industry trends and continuous learning reflects my passion for delivering high-quality, innovative solutions.

EDUCATION

University of Calicut   **Malappuram, Kerala**

WORK EXPERIENCE

SRV InfoTech   **Kannur, Kerala**
Flutter Developer   *July 2025 - Present*
Currently working at SRV infotech as a Flutter developer, a Software Development firm in Kannur, focusing on web development, web design, mobile apps, digital Marketing and SEO. Working in a dynamic environment with a technically rich team. Projects include:-

- Infi ERP :
  - Infi ERP is an advanced Inventory and Retail Management application developed by Soware Innovations Pvt. Ltd..
  - Soware Innovations Pvt. Ltd., formerly known as Soware Software Solutions, is a premier retail software provider headquartered in Cochin, Kerala. With over two decades of experience, we specialize in delivering reliable, cutting-edge software solutions to a wide range of clients, including supermarkets and distribution companies
  - It is designed to support both small retailers and large multi-branch enterprises, offering scalability, automation, and real-time insights
  - Infi ERP streamlines everything from purchase, sales, inventory tracking, and billing to analytics and reporting, helping businesses operate faster and more accurately

Cblu Digital   **Kozhikode, Kerala**
Flutter Developer   *January 2025 - July 2025*
Experience working at Cblu digital as a Flutter developer, building modern, user-focused mobile applications. I collaborate with a creative and driven team to design and develop solutions that are both visually stunning and technically sound. Focusing on performance, usability, and delivering real value to clients. Some innovative projects that I've worked in include :-

- Buktor Pro :
  - Buktor Pro is an appointment management, designed to streamline doctor-patient interactions for private consulting doctors & clinics. It offers features to enhance scheduling, consultation, and patient care.
  - Effortless Appointment Management: Schedule appointments via WhatsApp, online bookings, or Buktor campaigns.
  - Remote Consultations: Conduct video consultations through Zoom and Google Meet.
  - Real-Time Schedule Updates: Manage and adjust schedules instantly.
  - Patient Token Calling: Call tokens directly through the app to manage patient flow.
  - Comprehensive Appointment Calendar: View patient queue length, average consultation time, and more.
  - Profile Customization: Personalize your Buktor Pro page with unique slug, services, working hours, and clinic information.
  - Secure Payment Integration: Offer online payment options for added convenience and security
  - Latest version includes features like user roles and permissions, multiple pricing options, patient bulk upload, user activity logs, smart reminders, API/webhook integrations, related services linking, schedule control, manual reminders, and a centralized patient document drive.

- **CallTrack - Smart Call and Status Management :**
  - CallTrack is a call tracking app to help log, organize, & manage all calls effortlessly. Whether handling business calls, client interactions, or personal conversations, CallTrack ensures you stay on top of every call with detailed logs and status updates.
  - Call History Dashboard: View all recent incoming calls in a structured list. Entries include Caller phone number , Date & time of the call, Current status (e.g., Order not Taken, Preparing, Ready for Delivery, Picked up), One-tap call back etc
  - Smart Filters: Easily filter call logs based on task or order status. Statuses include All, Order not Taken ,Preparing, Ready for Delivery, Picked up, Quickly identify calls that need attention or follow-up.
  - Tasks/Items – A comprehensive item management section which is easily navigable.
  - Why Use CallTrack ? : It's ideal for businesses, freelancers, teams, or anyone managing customer or contact interactions. Boost your productivity with better call tracking, task follow-up and stay on top of every incoming call, ensuring timely responses.

BitProTechnologies   Tirur, Malappuram, Kerala
Flutter Developer   *October 2023 - December 2024*
Previously worked at Bitpro Technologies, where I focused on developing mobile applications using Flutter. The team is collaborative and passionate about pushing the envelope in app design and functionality. Loved being part of a process that emphasized creativity and innovation, and I enjoyed tackling various challenges to enhance user experiences. It was fulfilling to contribute to projects that made a difference for our clients and users alike. Here, I've took part and completed multiple projects using Flutter, including -

- **Product Checker :**
  - An app that focuses on user-friendly interface for real-time barcode scanning, utilizing the device's camera to fetch product details from a backend server and displaying information such as name, description, and price, while incorporating error handling, user feedback, and potential features like saving scan history for improved user experience.
- **Restaurant POS :**
  - A restaurant Point of Sale (POS) system that optimizes order management, payment processing, and inventory tracking, offering an efficient and visually appealing solution for managing restaurants.
- **The Student Graph :**
  - Enhanced Security and Efficiency: The system incorporates robust access controls to protect sensitive information while integrating academic and administrative functions, significantly enhancing overall operational efficiency.
  - Comprehensive Management Features: This project streamlines the management of student and staff information, encompassing attendance tracking, exam results, academic performance, fee collection, accounts management, and staff scheduling. It offers real-time data access and customizable reporting through user-friendly interfaces that simplify administrative tasks.
- **Chef Al Arabi :**
  - Streamlined Procurement Process: The app features a Product Wise Purchase List for selecting vendors, updating prices, units of measure (OUM), and quantities. It supports multiple vendor options and allows for recording cash purchase payments.
  - Enhanced Inventory Management: Users can track sales details through the Sales Order View, while GRN (Goods Receipt Note) functionality confirms received stock and converts boxes into kilograms with their corresponding prices. The Stock View provides real-time insights into warehouse stock and daily purchases, and the Day Book feature records cash transactions, ensuring efficient cash management. All entries are timestamped for accuracy.

Futura Labs   Kochi, Kerala
Flutter Developer   *May 2023 - October 2023*
- Completed a three-month internship and learned to build optimized responsive, high-performance mobile apps using Flutter, ensuring seamless functionality across Android and iOS platforms to ensure optimal user experience while also playing a pivotal role in integrating various APIs & third-party libraries. Also Demonstrated expertise by developing an app called Online Home Bakery, a user-friendly Android app for home bakers to display and sell their creations, facilitating seamless order placement, personalized pricing, and offering options while enabling easy product showcasing and broad audience reach.
