PROJECTS

Exam Practice [🔗](#)

2025 – 2025

Fullstack | Next.js | Tailwind CSS | Redux Toolkit

- Developed a fullstack exam practice platform using Next.js for server-side rendering and Tailwind CSS for responsive UI design.
- Implemented Redux Toolkit for efficient state management across the application.
- Features include user authentication, dynamic question rendering, score tracking, and an admin panel to manage questions and categories.

Voice Typing Text Editor [🔗](#)

2025 – 2025

- Implemented robust user authentication and authorization systems to ensure the **security and privacy of user information**.
- **Voice Typing Text Editor** is a modern, responsive web application built with **Next.js**, **MongoDB**, and **Tailwind CSS**. It allows users to **convert speech to text seamlessly**, providing a smooth and efficient typing experience. The app features **real-time voice recognition**, text editing capabilities, and **email integration via Nodemailer** for easy sharing. Designed with a sleek, mobile-friendly UI, it ensures accessibility and ease of use for all users.

E-Commerce [🔗](#)

2023 – 2023

- Managed e-commerce administration panel, optimizing product management processes and enhancing user experience.
- Implemented streamlined product addition methods and developed an intuitive interface for smooth browsing and secure transactions **with Razorpay** integration.
