

Objective:

To apply my expertise in software testing methodologies and automation tools to ensure the delivery of high-quality software products and enhance testing processes.

Summary:

- Having 3.1 years of experience in manual testing automation testing web service testing.
- Good experience with functional and non -functional testing.
- Good experience in selenium web Driver with Java.
- Good knowledge of web service testing, API testing, with basic of SQL.
- Good experience in investment banking and Telecom domain project.
- Strong knowledge of software QA methodologies, tools and process
- Experience working in an Agile/Scrum development process
- Having performed functional testing, GUI testing, sanity testing, regression testing
- Hands on experience in black box testing re-testing.
- Strongly follows SDLC/STLC. Follows Defect life cycle.
- Develop and maintain manual automated test process.
- Expertise in locating elements using xpath.
- Good experience of oops concepts
- Experience of assertion and annotations in testNG framework.
- Experience of creating POM and Test Classes for the framework.
- Good understanding of Automation Tool maven for Hybrid framework.
- Experienced in identifying test scenarios, creating test cases, and preparing test data.
- Having Knowledge of API Automation using Postman Tool.

Technical Skills:

Operating Systems	Windows XP, Windows 10, Windows 11
Programming	JAVA, SQL,
RDBMS	MySQL
Web services	Postman
Testing Tools	Selenium
Defect Tracking Tools	Jira

Professional Experience

Project Title: Telecom Domain.

Tools Used: Jira.

Platform: Web Application.

Team Size: 12
