Projects

Library Management

- **Technologies used:** React.js
- Developed a web-based application with Admin and User portals.
- Admin Portal: Add, update, delete books, add user and manage user information.
- User Portal: Read books, add to cart, and view cart.
- Implemented CRUD operations, role-based access, and responsive design.

Blinkit Clone

- **Technologies used:** React.js
- Built a fully functional grocery shopping web app inspired by Blinkit.
- Implemented category-based filtering (Vegetables, Fruits, Dairy, etc.), dynamic cart updates with quantity-based pricing, and real-time cart total calculation.
- Used local JSON data and React state management.
- Features include Add to Cart, Increment/Decrement Quantity, Remove Item, and View All Products.

Event Management

- **Technologies used:** React.js, Node.js, Express.js , Mongoddb.
- Built a secure, full-stack Event Management System using the MERN stack.
- Featuring OTP-based login for access control.
- Admins can create and manage events, view detailed booking data, and navigate between pages with dynamic routing.

Courses

MERN FullStack Development

Bengaluru

12/2024 - 06/2025
