PROJECT 5

Create Prototype for entire application based on the client specification.

Bootstrap used in creating the Application.

Responsible to manipulate HTML5, CSS3.

Implemented code according to coding standards.

DASHBOARD

The screenshot shows the 'Dossier Details' page of the DEKKERS TRANSPORT HOLLAND application. The header includes the company logo, a search bar, a language selector (English), and a user profile (Dominic Keller, Founder). The main navigation bar contains links for Orderbak, Planning, Bezetting, and Klanten. The 'Dossier Details' section features a breadcrumb trail (Home > Dossier > Dossier Details) and a filter dropdown. Below this is a table with columns for Dossier, Week, Opdrachtgever, Transport ref., Laaddatum, Laadtijd, Postcode, Laadadres, Laaddatum, Laadtijd, and Postcode. The table displays 8 entries for dossier 202118, week 19, with ALS Hendrix as the client. The footer shows the copyright notice (2021 © 2014, Alle rechten voorbehouden, Dekkers Transport Holland B.V.) and navigation links.

This screenshot shows the same 'Dossier Details' page, but with a modal window open. The modal contains four sections: 'Dossier en klant' (Dossier: 202118, Week: 19, Opdrachtgever: ALS Hendrix, Transport ref.: 562515), 'Laadadres' (Laaddatum: 11-05-2021, Laadtijd: 11.00, Postcode: 1122AB, Laadadres: Hilberdorp), 'Planning' (Truck, Chauffeur, 332 Doss PS, Melding Nosta 25), and 'Documenten' (a list of SKM files). A 'Log' section on the right shows a list of 'Laadatum aangepast' events. The footer and navigation bar are consistent with the previous screenshot.

This screenshot is identical to the previous one, showing the 'Dossier Details' page with the modal window open. It displays the same data for dossier 202118, week 19, and the associated load address, planning, and documents. The layout and navigation elements are consistent with the other screenshots.

PROJECT 6

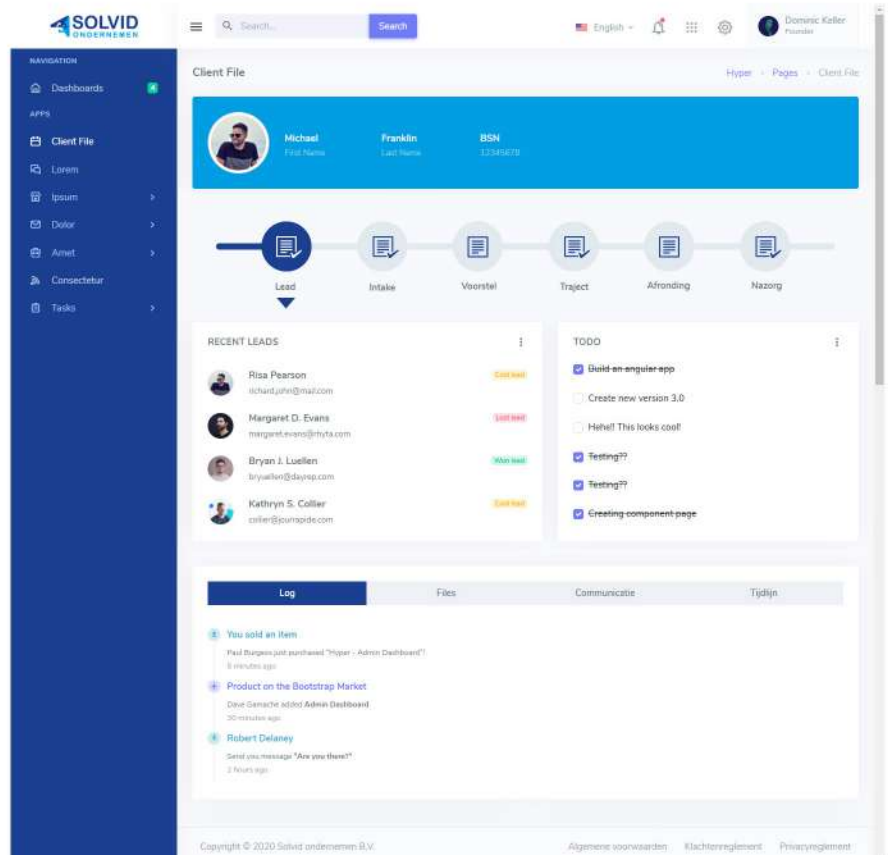

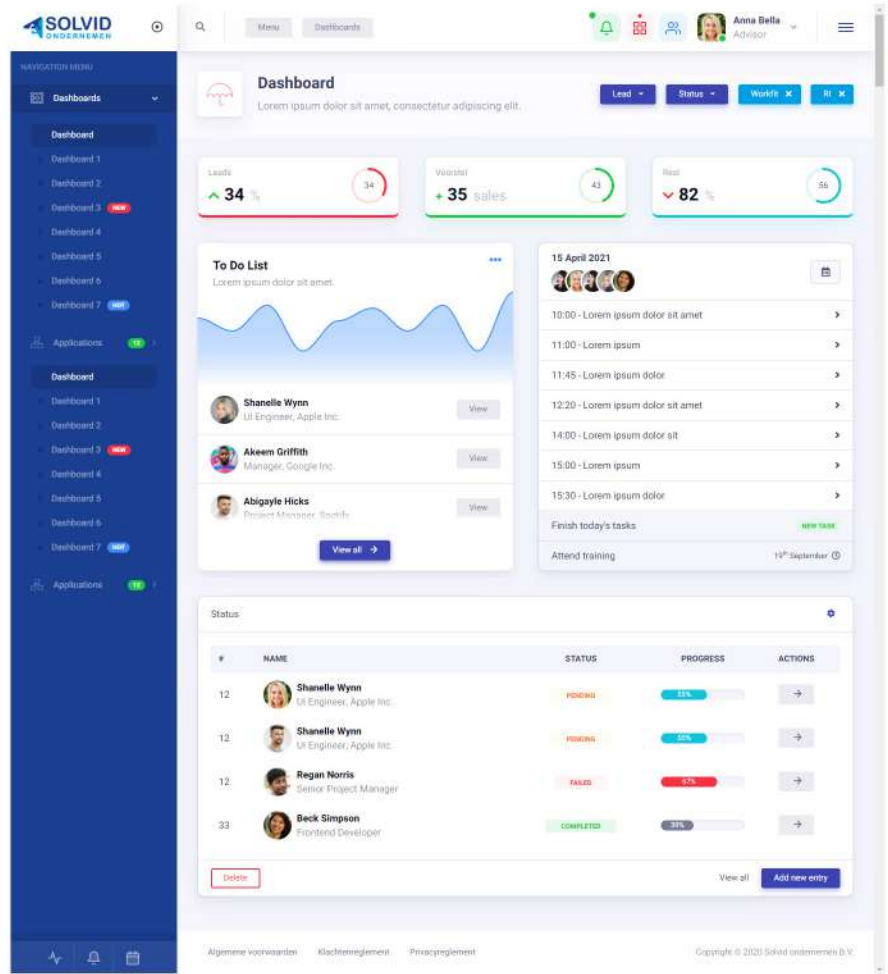

Create Prototype for entire application based on the client specification.
