SKILLS

Programming Languages	JavaScript,
Development :	React native, JavaScript, React.js, HTML, CSS
Development Tools:	Git, GitHub, VS Code
Learning :	React Native, Nodejs

PROJECT

Htraction

- Built a **multi-functional social UI** where users network, share ideas, and manage personal/company profiles—designed to mimic professional platforms like LinkedIn.
- Created **editable profile screens** for both individuals and companies, with sections for bio, posts, and activity logs—showcasing dynamic UI updates.
- Designed a **Home Feed** where users view/share posts, like/comment, and track connection activity—implemented with **FlatList optimizations**.
- Developed an **Ideas Screen** where users post ideas, tag connections, and simulate collaboration invites—demonstrating **UI-driven workflows**.
- [Github Link](#)

Tinny Tones

- Developed the frontend of an e-commerce platform for selling paintings using **React.js**.
- Designed and implemented a responsive and interactive UI with Tailwind CSS.
- Created role-based dashboards for users and artists to manage profiles and artwork.
- Integrated features like a shopping cart, search functionality, and secure order placement.
- Built components for user registration, login, and profile management.
- Designed artist tools for uploading and categorizing paintings.
- Enhanced **navigation** and user experience with clean design and dynamic functionality.
- [Github Link](#)

Chat Application

- **Responsive UI:** Designed an intuitive chat interface with **React Native (Flexbox, Custom Components)**.
- **User Authentication:** Integrated **Firebase Authentication** for secure user sign-up/login (Email/Phone).
- **Real-Time Messaging:** Implemented instant messaging using **Firebase Firestore** for storing and syncing messages in real-time.
- **Image Sharing:** Enabled users to **upload and share images** via **Firebase Storage**.
