PROJECT

Project Title: MetLife Vision and Auto
Domain: Insurance
Role: Manual Tester

Responsibilities:

- Analyzed business and functional requirements related to insurance policies for Vision and Auto products.
- Designed and executed detailed test cases based on user stories and requirement documents.
- Performed functional, regression, and smoke testing across web and mobile platforms.
- Conducted end-to-end testing to validate policy creation, premium calculations, and claim processing workflows.
- Logged and tracked defects using **Jira** and coordinated with developers for issue resolution.
- Performed **manual API testing** using **Postman** to verify request/response data for policy and claim services.
- Wrote **SQL queries** to validate backend insurance data and ensure accuracy in database records.
- Participated in Agile ceremonies like sprint planning, daily stand-ups, and sprint retrospectives.
- Collaborated with business analysts and developers to ensure quality standards were met before release.

Project Title: Big-Commerce
Domain: Fintech
Role: Manual Tester

Responsibilities:

- Reviewed and analyzed business requirements related to financial transactions, payments, and e-commerce workflows.
- Created and executed test cases for various modules including user registration, payment gateway, order processing, and transaction history.
- Performed functional, regression, UI, and integration testing on web-based fintech applications.
- Conducted **manual API testing** using **Postman** for payment and transaction-related services.
- Validated backend data by writing **SQL queries** to ensure accuracy of financial transactions and reports.
- Reported and tracked bugs using **Jira**, ensuring timely resolution through close coordination with developers.
- Participated in daily stand-ups, sprint planning, and retrospectives as part of the Agile process.
- Ensured high-quality releases by executing smoke tests during deployments and preparing test summary reports.

Testing Skills:

- Functional, Regression, Smoke, and UI Testing
- Test Case Design & Execution
- Defect Reporting (Jira)
- Manual API Testing (Postman)
- SQL for Data Validation
- Agile/Scrum Methodology
- Strong Analytical & Communication Skills

Languages:-

- **SQL Basics** – For backend validation
- **Basic HTML & CSS** – To understand UI bugs better
