PROJECTS

Furniture E-Commerce Service :(HTML, CSS, Bootstrap,JQuery, Ajax, PHP, MySQL)

- Provide customers with a convenient and user-friendly platform to browse and purchase furniture products online.

News blog :(HTML, CSS, Bootstrap,JQuery, Ajax, PHP, MySQL)

- Publish and share news articles, stories, and updates on various topics.

Attendance Management System :(HTML, CSS, Bootstrap,JQuery, Ajax, PHP, MySQL)

- The purpose of the Attendance Management System (AMS) project is to digitize and automate the process of recording, tracking, and managing attendance of students or any other group of individuals. It is designed to reduce manual errors, save time, and improve efficiency.

Book Shop :(HTML, CSS, Bootstrap,JQuery, Ajax, PHP, MySQL)

- The purpose of the Online Book Shop project is to develop a web-based platform that allows users to browse, search, purchase, and manage books online efficiently. This system is designed to simplify the buying process, enhance user convenience, and digitize the traditional bookstore experience.

Job Portal : (HTML, CSS, JavaScript)

- The purpose of the Job Portal project is to create a digital platform that connects job seekers with employers, making the recruitment and job search process faster, easier, and more efficient. The system provides a centralized location where job vacancies can be posted, and candidates can apply, upload resumes, and track their application status.

SKILLS

Languages : C, C++, JavaScript, PHP, Python.

Database : MySQL, SQLite3, MongoDB.

Frameworks : Bootstrap, React, Django.

Library : JQuery, Express.

Extras : Razorpay / PayPal SDK, MVC.
