Welcome

As a final-year student specializing in Artificial Intelligence and Data Science, I am passionate about deepening my expertise in Machine Learning, Data Science, and Data Analysis. With a solid foundation in algorithms, statistical modeling, and data-driven decision-making, I am eager to apply the theoretical knowledge gained through my coursework to real-world challenges.

Education

Bachelor's in Artificial Intelligence and Data Science, MIT College Oct 2021 – Apr 2025

- GPA: 7.11
- **Coursework:** Machine Learning, Artificial Intelligence, Data Science, Data Analysis, Comparison of learning algorithms, Deep learning

Jun 2019 – Mar 2020

HSC (Higher Secondary Certificate)

- SVB College, Bhandegaon
- Percentage: 83.80

Skills

- **Technical Skills:**
 - Data Analysis, MS-Excel, Power BI, Tableau, etc.
- **Tools :**
 - NumPy, Pandas, Matplotlib, Streamlit, Jupyter Notebook, Git and GitHub, etc.
- **Languages :**
 - Python, SQL, etc.
- **Soft Skills :**
 - Teamwork, Problem-solving, Decision-making, Creativity, Communication, etc.

Projects

Car Sales Analysis

GitHub

- Designed and developed an interactive dashboard to analyze and visualize car sales data, enabling clear insights into sales performance across regions, car brands, models, and time periods. Implemented DAX formulas and Power BI visuals (bar charts, KPIs, slicers, etc.) to track metrics like total sales, revenue trends and regional comparisons..
- Tools Used: Power BI, SQL, MS-Excel, etc

Hospital Emergency Room Dashboard

GitHub

- The ER Dashboard is a Power BI project designed to provide real-time insights into ER operations and performance. It includes four key dashboards: Monthly View, Consolidated View, Patient Details, and Key Takeaways. The dashboard tracks critical KPIs like patient volume, wait times, satisfaction scores, and referrals.
- Tools Used: MS-Excel, Power BI, etc
